### DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to low deck vehicle with air cleaner , classified in class 55, subclass 385.3.
- II. Claims 6-10, drawn to low deck vehicle with v shaped engine and air intake hoses between v shaped banks of engine, classified in class 123, subclass 184.31.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions, the invention of group I not requiring the specific structure of the low deck vehicle frame and air intake connecting hoses, and the invention of group II not requiring structure for inspecting an air cleaner from a side of the low deck vehicle..

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
